

Superior Vision is a matter of DNA.

Soaring at 1,000 feet, the bald eagle can spot a moving rabbit within a 3 square mile area. Its vision is not only 5X that of a human, it can see forward and sideways at the same time! And it can rotate its head almost 270°. Its vision is simply superior.

Compared to other document cameras, Samsung has superior DNA. It combines precision optical magnification with digital magnification to deliver phenomenal clarity. And the Samsung SDP-850 Series has 270° head rotation flexibility so it can easily project images of objects from up close to across the room.

- Total magnification: 42x (14x optical, 3x digital)
- Frame rate: True, 20 frames/sec minimum
- Sturdy metal construction
- Create instant jpgs or movies (DX)
- High speed, accurate auto focus
- Full motion, full screen desktop display for use with any electronic whiteboard (DX)
