

To Be a Leader, It Takes Vision.

While best known for its teeth, the shark actually has superior vision to most fish and mammals. Which helps to explain why sharks have dominated the seas for over 400 million years.

Like the shark, Samsung has superior vision compared to other document cameras. It combines precision optical with digital magnification to deliver eye-popping image quality. And the Samsung UF-80 series with its user-friendly features is the perfect instrument for you to create jaw-dropping live presentations!

- Powerful 42X zoom (14X optical, 3X digital zoom)
- Native XGA live images with 20fps real-time motion
- Supports DVI output plus USB 2.0 for Mac and PC preview and capture
- Create instant jpgs or movies
- 1/3" 850,000pixels PS CCD
- User-friendly design, easy control with mouse and GUI

To see the full family of Samsung Digital Presenters, starting as low as **\$899**, log onto www.samsungpresenterusa.com or contact Samsung Opto-Electronics America at 1-800-762-7746, ext 506.
